CAREER OBJECTIVE

Highly skilled and motivated Full Stack Web Developer with a passion for creating innovative and user-centric web applications. Offering a strong foundation in front-end and back-end development, I am seeking a challenging role where I can utilize my technical expertise and creativity to contribute to the success of dynamic projects. Committed to delivering high-quality, scalable, and efficient solutions, I aim to collaborate with a diverse team to build exceptional user experiences and drive business growth. Seeking an opportunity to continuously learn and grow in a fast-paced and collaborative environment while making a significant impact in the field of web development.

WORK EXPERIENCE

Freelance Web Developer

Work from home

📅 December 2022 – current   📍 Remote

- Engaged in self-initiated web development projects to continuously enhance skills and build a diverse portfolio.
- Developed and maintained personal projects, showcasing proficiency in technologies such as HTML/CSS, JavaScript, and relevant frameworks.
- Conducted thorough testing and debugging on personal projects, ensuring clean and efficient code.
- Utilized platforms like GitHub to host personal projects and demonstrate version control and collaboration skills.
- Proactively explored new web development trends and best practices through online courses, tutorials, and tech blogs.
- Created a professional website or portfolio showcasing completed personal projects and proficiency in web development technologies.

Software Engineer

Palawan State University Research Office

📅 June 2019 – October 2022   📍 Puerto Princesa, Palawan, PH

- Managed and maintained computer networks and systems, ensuring a 99.9% uptime and minimizing system downtime for optimal productivity.
- Developed a robust Windows application database, accommodating 500+ of research papers exclusively for teacher use in the university.
- Gathered and translated project requirements from university stakeholders, ensuring a 100% alignment of the database with their needs and expectations.
- Implemented security measures, including regular backups and updates, resulting in a 95% reduction in security incidents and protecting websites from potential threats.
- Conducted user feedback sessions and implemented improvements, resulting in a 20% increase in user satisfaction with the database.
- Developed and launched a user-friendly journal website, resulting in a significant increase in paper submissions from researchers, academicians, and contributors.

- Implemented efficient paper management functionalities, resulting in a 50% reduction in administrative overhead and improved visibility of academic research for the university.
- Managed website analytics and provided insights to stakeholders, contributing to a 25% increase in website traffic and user engagement.
- Perform regular backups of website files and databases to prevent data loss and ensure disaster recovery preparedness.

Web Developer

E-estate Realty Corp.
